“

“The SynBioReactor is a thoughtful initiative that brings together researchers, startups,

and industry to explore the potential of synthetic biology.

**CDD had the opportunity to exhibit at the event and connect with a number of participants.** It was a great space to learn about emerging projects and to see how tools like CDD Vault support data management and collaboration in this field.”

“

Showcasing Mimotype's approach to fuse SynBio and nanotechnology by engineering advanced fluorescent protein variants allowed us to engage with a high-caliber audience.

Following the event, new research partnerships were forged that propel us forward and onward. We are a proud partner.
